

LAB 4: Library-API

FEDNARD IRUNGU

C027-01-0543/2024

The screenshot shows a web browser displaying the OpenAPI documentation for a 'Library Management API'. The browser's address bar shows the URL '127.0.0.1:8000/docs'. The API title is 'Library Management API' with version '0.1.0' and 'OAS 3.1' tags. Below the title, there is a link to '/openapi.json'. The main content area is titled 'default' and lists ten API endpoints, each with a method, path, and description. The endpoints are: GET / (Read Root), POST /books/ (Create Book), GET /books/ (List Books), GET /books/{book_id} (Get Book), PUT /books/{book_id} (Update Book), PATCH /books/{book_id} (Patch Book), GET /categories/ (List Categories), POST /categories/ (Create Category), GET /categories/{category_id} (Get Category), and GET /books/search/ (Search Books). Each endpoint is represented by a colored bar with a dropdown arrow on the right.

Library Management API 0.1.0 OAS 3.1
